DISCUSSION: The committee continued discussions regarding the Board's piloting of a new inspection process wherein an inspector may issue at the conclusion of a routine inspection a modified consent order imposing monetary penalties when the on-site inspection discloses certain violations of law or regulation. The committee reviewed and amended the major deficiency, as it was listed in guidance document 110-9, regarding the monitoring of refrigerator and freezer temperatures and also recommended language for a new minor deficiency for this requirement. Additionally, the committee reviewed USP Chapters 795 and 797 regarding non-sterile and sterile compounding and identified areas for inspection. Recommendations for major and minor deficiencies regarding these subjects were also established, along with corresponding monetary penalties. The committees recommendations will be presented to the full Board for review at the next full Board meeting to be held June 2, 2010.

ADJOURN: The meeting adjourned at 2:30 p.m.
